Dear Alma Mater

Leo R. Lewis A1887

*We con beside thy knee,
Dear Alma Mater,
Earth's book of mystery,
Dear Alma Mater,
We track the storied past,
Dear Alma Mater,
Over plains of learning vast,
Dear Alma Mater,
Speed on thy sunlit way,
Dear Alma Mater,
We vow new faith today,
Dear Alma Mater!
May glory light thy name,
Dear Alma Mater,
All thy children sing thy fame,
Dear Alma Mater, for aye!*

Academic Mace

Ceremonial maces were originally carried as a symbol of royal authority, dating back to the Middle Ages. The academic mace is a symbol of the authority invested in the president by the university's governing body. Tufts' mace is adorned with a medallion engraved with the official seal of the university and is carried before the president in academic processions in formal ceremonies such as commencement and inaugurations.

Academic Regalia

Traditional academic regalia has been worn by the Tufts faculty since the Commencement of 1906. The gown for the Bachelor's degree has pointed sleeves and is designed to be worn closed. The Master's gown has elbow-length, pointed sleeves; the Doctor's gown has bell-shaped sleeves; both may be worn open or closed. The Doctor's gown is faced, and the sleeves are trimmed with velvet. By its color and arrangement, the hood worn with the gown indicates the wearer's highest advanced degree, the field in which it was awarded, and the school from which it came. The lining of the hood carries the school's colors, brown and blue in the case of Tufts. The velvet edging on the hood, wider for the Doctor's degree than for the Master's degree, signifies by its color the field in which

Tuftonia's Day

Elliot Wright Hayes A1916

*Steady and true, rush along, Brown and Blue.
Raise a mighty score today.
Fearless tear down the field and never yield!
Brown and Blue, Brown and Blue for aye!
Hammer them hard, boys, and break through their guard.
That is old Tuftonia's way.
And our glorious banner once again will wave o'er
Tuftonia's Day.
T-u-f-t-s, T-u-f-t-s, Hurrah! Hurrah! for dear old Brown
and Blue!*

Refrain:

*Up on the Hill tonight all will be gay.
Victorious in the fight, we'll raise the standard of dear old
Tufts to glory!
Pile up a mighty score.
It's bound to soar.
Now one goal more!
Nothing can stop us; it's Tuftonia's Day.*

The mahogany stand displaying the mace was designed and built by students from Medford Vocational Technical High School and was presented to President Monaco in April 2015.

the degree was designated. Master of Science and Doctor of Science hoods are trimmed in yellow; Engineering in orange; Medicine in green; Dental Medicine in lilac; Doctor of Philosophy in blue; and Veterinary Medicine in grey. The mortarboard or Oxford-type cap is the one usually worn, but of late, the soft cap, which resembles an oversized beret, has come into favor because of its comfort. Tassels, other than the universally accepted black, may indicate by the various colors the field of learning in which the degree is earned, while the gold tassel generally signifies a doctoral degree. Many foreign universities show great diversity, following traditions that extend back for centuries.

Recipients of Honorary Degrees

Asked to review a formal program bio, **KENYA BARRIS'** instinct is to send up the pious conventions of the genre. "What can be said about a man who has a neck tattoo on his tongue?" he suggests it begin. "From arthritis research to subsistence farming, Kenya Barris has done it all. The proud recipient of a prestigious 1998 Federal Tax Lien..." But Barris' accomplishments are in fact very real—as a writer, director, showrunner, and producer whose work blends comedy and social commentary in the tradition of Norman Lear and Spike Lee.

His Emmy-nominated, Golden Globe-winning show *Black-ish* just finished its third season, and Barris has earned it. He sold 19 pilots before he finally got *Black-ish* on the air. The series centers on Andre "Dre" Johnson, who, like Barris, is the father of a large family, the husband of a doctor, and a highly successful Black professional with inner-city roots who's often bewildered by the world of privilege in which his children grow up.

Barris was raised by his divorced mother in a low-income neighborhood of Los Angeles. Midway through his childhood, the family relocated to the more affluent neighborhood of Hancock Park, a move up the socio-economic ladder that was life-changing for Barris. "We sort of went up a rung, and I was just at that age where I was old enough to see both sides, so that really influenced who I am," he recalled during an interview with NPR's *Fresh Air* in 2016.

He attended Clark Atlanta University and Morehouse College in Atlanta, where he got involved in the Atlanta comedy scene doing stand-up that he describes as "meh." Back in Los Angeles, he began writing for television, including the sitcom *Sister/Sister*, the late-night *The Keenan Ivory Wayans Show*, the Showtime drama series *Soul Food*, and the comedies *Listen Up*, *Like Family*, *The Game*, *Girlfriends*, and *I Hate My Teenage Daughter*.

Together with his childhood friend, model Tyra Banks, he co-created the reality TV blockbuster *America's Next Top Model*, which has run on VH1 for twenty-three seasons. He also wrote and created BET's *The Start Up* and Hulu's first half-hour comedy series, *We Got Next*. His first feature film, *Barbershop: The Next Cut*, was released in 2016.

Black-ish premiered on ABC in 2014 and has received critical and audience acclaim. Barris has penned the particularly topical episodes: one about police violence titled "Hope," and one that closely followed the 2016 presidential election, "Lemons."

"We want to start a conversation," Barris told the *New York Times* after the broadcast. "We try to do it in a way that's entertaining and doesn't feel saccharine or like we're on a pulpit."

This past year, Kenya has co-created the hour-long pilot *Unit Zero* starring Toni Collette and the half-hour pilot *Libby & Malcolm* starring Courtney B. Vance and Felicity Huffman. He's also developing several projects with 20th Century Fox Film, including *White Men Can't Jump*, *Cheaper by the Dozen*, and *Stir Crazy*.

Barris will receive an honorary Doctor of Humane Letters degree.

BRUCE BAUM, D71, believes that research provides the intellectual underpinnings of dentistry. During his long tenure at the National Institutes of Health (NIH), Baum has applied the tools of inquiry and scientific discovery to transform theory into treatments that improve patients' quality of life. His expertise is in the field of gene transfer, the process of inserting new genetic material into cells. He has led promising research on using gene transfer to treat patients with damaged salivary glands—primarily those who have undergone radiation for head or neck cancers, or who have certain autoimmune diseases—and the chronic, debilitating dry mouth that can ensue.

Baum is a scientist emeritus at the National Institute of Dental and Craniofacial Research (NIDCR), part of the NIH, in Bethesda, Maryland. He began his career at the NIH five years after graduating from Tufts University School of Dental Medicine. But it was during dental school, under the guidance and mentorship of several of his professors, that Baum's interest turned toward research as a way to benefit patients.

"As health-care professionals, we are obligated to improve the standard of care available. I was taught that lesson on my first day at Tufts" by then-Dean Louis Calisti, Baum said in 2009, during a keynote address at Bates-Andrews Day, the dental school's annual student research fair. His first NIH position was at the National Heart, Lung, and Blood Institute. He eventually moved to the NIDCR, where his group focused on salivary glands, and he eventually became chief of the NIDCR's Gene Therapy and Therapeutics Branch. By the early 1990s, he hit upon the idea that emerging gene transfer technology might be a way to restore damaged salivary glands and provide relief to patients who not only battled the parching discomfort of dry mouth, but who faced a higher risk for other health conditions as a result.

Recipients of Honorary Degrees

The idea bore fruit. Baum and his colleagues conducted the first-ever clinical study of gene transfer in a human salivary gland. In research published in 2012 in the *Proceedings of the National Academy of Sciences*, they demonstrated that a gene that expresses a protein that forms new water channels could be safely transferred into a person and improve salivary secretion. “You cannot imagine how fulfilling it is to jot down an idea on a napkin in 1991 and then see it enter a clinical trial and help people,” Baum said of the discovery.

Baum has maintained an interest in health sciences education and is the former director of the NIH Medical Research Scholars Program, in which medical, dental, and veterinary students spend a year at the NIH in Bethesda studying and conducting research. He is an advocate for including more biological sciences in dental education and for helping students develop critical-thinking skills.

Baum, who holds a doctorate in biochemistry from Boston University, has served on multiple journal editorial boards and on dental school review panels. Among many honors, Baum was elected to the National Academy of Medicine in 2007. He is a former member of the board of advisors to Tufts School of Dental Medicine and received the Tufts Alumni Association’s highest honor, the Distinguished Service Award, in 2002.

Tufts will award him an honorary Doctor of Science degree.

When **SEAN B. CARROLL**, SK83, was growing up in Toledo, Ohio, he kept all types of snakes, fascinated by the beautiful and intricate patterns on some of their skins. Searching in nature for other kinds of patterns—the rules that govern life—has become his life’s work. The Allan Wilson Professor of Molecular Biology, Genetics, and Medical Genetics at the University of Wisconsin–Madison and vice president for science education at the Howard Hughes Medical Institute, the largest private supporter of science education activities in the United States, Carroll is an internationally recognized evolutionary biologist and science communicator.

Carroll graduated from Washington University in St. Louis in two years and came to Tufts, earning a Ph.D. in immunology from the Sackler School of Graduate Biomedical Sciences. He became consumed with the question of how animals develop, and is now recognized as a pioneer in the field of evolutionary developmental biology. Early on, he studied how fruit fly wings are patterned from their earliest stages and demonstrated

how genes known to have key roles in the development of one insect work differently in other bugs, pointing to early evolutionary origins.

“What really distinguishes Sean is his ability to bring together molecular biology and genetics with classical questions of evolutionary biology. He has an outstanding sense of how to approach old questions in new ways,” said Matthew Scott, a professor of developmental biology at Stanford University and a former fellow Howard Hughes Medical Institute investigator. The two collaborated studying the embryonic development of fruit flies.

Carroll is a recipient of the Benjamin Franklin Medal in Life Science from The Franklin Institute and has been elected to the National Academy of Sciences and named a fellow of the American Academy of Arts and Sciences and the American Association for the Advancement of Science. Last year he received the Lewis Thomas Prize for Writing about Science, recognizing his body of work. His books include *Endless Forms Most Beautiful* (2005), which the *Guardian* called “one of the essential books of our time, explaining for a general audience how the shapes of organisms are produced by genes,” as well as *The Making of the Fittest* (2006) and *Remarkable Creatures: Epic Adventures in the Search for the Origins of Species*, which was a finalist for the 2009 National Book Award for nonfiction. His most recent book is *The Serengeti Rules: The Quest to Understand How Life Works and Why It Matters* (2016). In a review of his latest work, the *Financial Times* called Carroll “one of the top storytellers in contemporary science.” Carroll is also the architect of the Howard Hughes Medical Institute’s science filmmaking initiative, and has served as an executive producer and on-screen presenter for a number of feature and short films for outlets including PBS, the Smithsonian Channel, and IMAX.

For his work in education, he has received the Stephen Jay Gould Prize for the Improvement of the Understanding of Evolution from the Society for the Study of Evolution, the Distinguished Service Award of the National Association of Biology Teachers, and the Viktor Hamburger Outstanding Educator Award from the Society for Developmental Biology, as well as numerous honorary lectureships. Carroll was named one of America’s most promising leaders under 40 by *Time* magazine in 1994.

Tufts will award the Sackler School alumnus an honorary Doctor of Science degree.

Recipients of Honorary Degrees

After moving to the United States from her native Mexico when she was five, **MARIA CONTRERAS-SWEET** watched her single mother struggle to find a job to support her six children. She imagined a brighter future for her kids. Contreras-Sweet recalls soon after that boasting to her grandmother that she had just become the third-grade milk monitor. Her grandmother Emilia said then, “It’s not the titles you have, it’s what you do with the titles you have that really matters.” This notion seeded her early dedication to public service.

Contreras-Sweet’s trailblazing career has spanned the private sector and government service, from corporate officer to U.S. Cabinet member, serving in President Barack Obama’s administration as the head of the U.S. Small Business Administration (SBA). At the SBA, she oversaw the world’s largest business counseling network, the federal small-business contracting program, and a \$120 billion loan program. During her nomination, President Obama said that when Contreras-Sweet founded her bank, “she helped small businesses get their good ideas off the ground, to expand, to hire, to sell their products and ideas, not only in our domestic markets, but also overseas.”

When she immigrated to California, Contreras-Sweet spoke no English, but as she learned her new language, she excelled. “Once you learn any language—whether it’s English or the language of business, medicine, or law, you can get in the game and succeed,” Contreras-Sweet said.

Earlier in her career, she served as vice president of public affairs for the 7-Up/RC Bottling Company, where she was a leading corporate negotiator for the creation of the Beverage Container Recycling and Litter Reduction Act, which led to the largest expansion of California’s recycling system.

As California’s Cabinet Secretary of the Business, Transportation, and Housing Agency from 1999 to 2003, Contreras-Sweet managed 44,000 employees, a \$14 billion budget, and fourteen departments. She led the creation of the state’s Department of Managed Health Care and its Office of the Patient Advocate. During California’s energy crisis in the early 2000s, she chaired the finance committee of the state’s electric power grid, helping to stabilize the energy market.

In 2006, Contreras-Sweet took on a new challenge, founding ProAmérica Bank, which finances small- and mid-sized businesses, especially those run by Latino entrepreneurs. She left the bank to serve on President Obama’s Cabinet.

Her generous volunteerism includes co-founding The California Endowment, a \$3 billion health-related philanthropy; serving as a U.S. Senate appointee to the Federal Glass Ceiling Commission, advocating for the advancement of women and minorities in the public and private sector; and founding Hispanas Organized for Political Equality, which seeks political and economic parity for Hispanic women.

In recognition of her international leadership, the Global Entrepreneurship Congress established the Maria Contreras-Sweet Award for Global Impact.

Maria’s grandmother would encourage her to work hard so that someday she could work in an office and be a secretary. “Little did she know that I would hold office and become California’s Cabinet Secretary of Business, Transportation, and Housing.”

Tufts will award Contreras-Sweet an honorary Doctor of Public Service degree.

JOYCE CUMMINGS, J97P, M97P, has blazed a trail in both local and international philanthropy, alongside her husband, William (Bill) Cummings, A58, H06, J97P, M97P.

In May 2011, after quietly contributing to the local community for many years, Joyce and Bill were the first Massachusetts family to join the Giving Pledge. Through this charitable-giving pact created by Bill and Melinda Gates and Warren Buffett, some of the world’s wealthiest individuals have pledged to donate at least half of their assets for philanthropic purposes. Joyce explained in a speech to the Boston Foundation that their public commitment had two purposes. “The first was to encourage others to get involved with philanthropy and to give what they could,” she said. The second was to make their new grant-making foundation more widely known—so it could do more good.

Joyce serves as a trustee for Cummings Foundation, which was founded in 1986 and is now one of the largest private foundations in New England. It has awarded more than \$160 million to nonprofits serving a broad range of causes in the greater Boston area, including human services, education, health care, and social justice.

Joyce and Bill have been extraordinary supporters of Tufts University. In 2005, Cummings Foundation committed \$50 million to what is now known as Cummings School of Veterinary Medicine at Tufts, the only veterinary school in New England, in recognition of its critical role in combating global pandemics and advancing the Massachusetts biotechnology industry. Bill is a trustee emeritus of the university.

Recipients of Honorary Degrees

Through the foundation's Institute for World Justice, the couple supports education to help prevent future genocides and, in Rwanda, collaborative efforts with Partners In Health and others to aid in the post-genocide recovery and rebuilding of that East African nation. Joyce and Bill were inspired to confront societal conditions that might lead to genocide after a 2009 trip to Israel, during which they heard Holocaust survivor Eliezer Ayalon speak in Jerusalem. Joyce told the *Boston Globe* that on the flight home, "We looked at each other and said, 'We have to do something. We can't just go back home to our happy-go-lucky life.'"

The couple already has given away most of their fortune. "They've almost behaved as if the money really wasn't theirs from the very beginning," Tufts University President Emeritus Lawrence Bacow told the *Boston Globe* in 2011. "They've been stewards for it."

During an address at Endicott College's commencement ceremony last year, Joyce noted that at many points in their life together, she and Bill had dreams about public service that exceeded their financial capacity to give. However, she told the students that "as you begin to give, you find there are infinite ways to 'do' philanthropy. Time and talent are as helpful as money."

Joyce Cummings is a past president of En Ka Society of Winchester, Massachusetts, a women's service organization, and a former trustee of Massachusetts Eye and Ear, where she worked as a hospital dietitian. She was a longtime member of the boards of trustees of Winchester Community Music School and VNA Hospice Care of Woburn, Massachusetts. A graduate of the University of Alabama at Birmingham, she holds honorary degrees from Endicott College and Salem State University.

Tufts will award her an honorary Doctor of Public Service degree.

When **JEAN MCGUIRE**, G63, was interviewed in the late 1980s about her work on the award-winning television documentary *Eyes on the Prize*, about the civil rights movement, she observed, "We all have the ability to do something good. We just need the proper resources to help make our goals and abilities possible."

McGuire made sure tens of thousands of urban schoolchildren had those resources as executive director of METCO, the Metropolitan Council for Educational Opportunity, which is the nation's longest continuously running voluntary school desegregation program.

For more than four decades, she championed METCO's vision to provide students in underfunded Boston schools the enriching education afforded by wealthier suburban school districts. She was also the first black woman to win a seat on the Boston School Committee, in 1981.

McGuire grew up in the Boston area, and then went to Washington, D.C., to attend high school. She attended Howard University for three years before getting married, and later earned a B.S. in education from Boston State College (it merged with University of Massachusetts Boston in 1982). She earned a master's degree in education from Tufts in 1963.

As a young teacher in the Boston public school system, she found herself in the midst of turmoil. The Massachusetts Racial Imbalance Act of 1965 catalyzed the desegregation of the city's public schools, a mandate that ignited strong opposition. At the same time, pressure from black parents, frustrated with the Boston public schools and the Boston School Committee, gave rise to METCO, a grassroots program launched in 1966 with funding from the Carnegie Foundation.

METCO offered a different approach to school desegregation: the voluntary transfer of students to other school districts. METCO aimed to expand opportunities for students in underfunded school districts, increase diversity in suburban schools, and give all students an enriching, integrated learning experience. In its first year, seven Massachusetts school districts (Braintree, Lincoln, Arlington, Brookline, Lexington, Newton, and Wellesley) began accepting Boston public school students.

McGuire was on board. She had witnessed how predominantly African-American schools often lacked even basic supplies. She became METCO's fourth executive director in 1973 and oversaw the voluntary placement of tens of thousands of students of color from Boston in 190 suburban schools.

She has served on the boards of organizations such as the Boston Children's Museum, Community Change Inc., and the Black Educators' Alliance of Massachusetts.

"She stood up for what was right, regardless of the ramifications," Barbara Fields, of the Black Educators' Alliance of Massachusetts, told the *Boston Globe*. "She eats, sleeps, dreams, and works by what is best for children...She really is an icon and a legend and paved the way for those of us who came after her."

Recipients of Honorary Degrees

After leading METCO for forty-three years, McGuire stepped down in 2016. For her dedication to closing the educational equity gap, she was named humanitarian of the year in 2004 by the Boston Ethical Community; in 2012, Community Change awarded her a lifetime achievement award.

Tufts will award McGuire an honorary Doctor of Public Service degree.

JOSEPH WILLIAM POLISI, F70, has been president of The Juilliard School since 1984. In addition to serving as an academic leader for more than forty years, he is an accomplished bassoonist who is known for his influential writing on public policy and the arts. Polisi is a champion of the importance of a liberal arts education, even for the most gifted performers. Many students have heeded his call to balance hours sequestered in the practice room with active engagement in the world around them. In his book of essays, *The Artist as Citizen*, he wrote, “There should be no dividing line between artistic excellence and social consciousness.”

Polisi first studied music with his father, William Polisi, principal bassoonist with the New York Philharmonic and a Juilliard faculty member. He continued playing as an undergraduate at the University of Connecticut, although he majored in political science. It was the Vietnam era, and he was active on campus, serving on the student union’s board of governors and organizing a popular speak-out forum series. He went on to earn a master’s degree in international relations at The Fletcher School.

Polisi worked briefly as a journalist, but soon realized that his true passion was music. He enrolled at the Yale University School of Music, earning a Master of Music in 1973, a Master of Musical Arts in 1975, and a Doctor of Musical Arts in 1980. He went on to become executive officer of the Yale School of Music (1976–80), dean of faculty at the Manhattan School of Music (1980–83), and dean of the University of Cincinnati College-Conservatory of Music (1983–84) before becoming the sixth president of Juilliard.

At Juilliard, he led a \$300 million capital campaign and oversaw the construction of the school’s first on-campus housing and a \$199 million renovation of the main Juilliard building, completed in 2009. His engagement with the international community that was nurtured at Fletcher saw new expression in 2010 when he founded Juilliard Global, a program to bring Juilliard expertise to selected sites around the world, and in 2014 he introduced Juilliard Global

Ventures, a major initiative to reach students in new locations through site-based and digital education. A major component of this initiative is the Tianjin Juilliard School, a branch campus scheduled to open in China in September 2019.

He has championed the inclusion of liberal arts and humanities courses in the Juilliard curriculum, believing that performing artists need broad skills to advocate for their art. “These artists must be not only communicative through their art, but also knowledgeable about the intricacies of their society—politically, economically, socially—so that they can effectively work toward showing the power of the arts to nations and their people,” he wrote. In the same vein, he asks students to share their gifts at local hospitals, nursing homes, and schools.

Polisi has performed as a soloist and chamber musician throughout the United States. He has produced several recordings, primarily focusing on contemporary American music, and recorded a solo album of twentieth-century bassoon music. He wrote a 2008 biography of composer and arts administrator William Schuman, entitled *American Muse: The Life and Times of William Schuman*.

Polisi will receive an honorary Doctor of Fine Arts degree.

A Modern Hippocratic Oath (modified)

By **Louis Lasagna, M.D., Dean Emeritus, Sackler School of Graduate Biomedical Sciences**

I swear to fulfill, to the best of my ability and judgment, this covenant:

I will respect the hard-won scientific gains of those physicians in whose steps I walk, and gladly share such knowledge as is mine with those who are to follow.

I will apply, for the benefit of the sick, all measures, which are required, avoiding those twin traps of over-treatment and therapeutic nihilism.

I will remember that there is art to medicine as well as science, and that warmth, sympathy, and understanding may outweigh the surgeon's knife or the chemist's drug.

I will not be ashamed to say, "I know not," nor will I fail to call in my colleagues when the skills of another are needed for a patient's recovery.

I will respect the privacy of my patients, for their problems are not disclosed to me that the world may know. Most especially must I tread with care in matters of life and death.

I will remember that I do not treat a fever chart, or a cancerous growth, but a sick human being, whose illness may affect the person's family and economic stability. My responsibility includes these related problems, if I am to care adequately for the sick.

I will prevent disease whenever I can, for prevention is preferable to cure.

I will remember that I remain a member of society, with special obligations to all my fellow human beings, those sound of mind and body, as well as the infirm.

If I do not violate this oath, may I enjoy life and art, respected while I live and remembered with affection thereafter.

May I always act so as to preserve the finest traditions of my calling and may I long experience the joy of healing those who seek my help.

An Oath for the Dental Graduate

I solemnly pledge to devote my efforts to the care of my patients.

As a member of society, with special obligations, I will treat all patients without prejudice, incorporating the knowledge and skills instilled in me by my teachers.

I will practice dentistry in an ethical and professional manner.

I will hold in confidence all matters related to them.

I will not hesitate to call upon my colleagues when their knowledge and skills are needed.

I will make every effort to maintain, contribute to, and enhance the quality of the dental profession.

I will constantly keep in mind that the practice of dentistry is a true mingling of science, technology, and caring.

Veterinarian's Oath

Being admitted to the profession of veterinary medicine, I solemnly swear to use my scientific knowledge and skills for the benefit of society through the protection of animal health and welfare, the prevention and relief of animal suffering, the conservation of animal resources, the promotion of public health, and the advancement of medical knowledge.

I will practice my profession conscientiously, with dignity, and in keeping with the principles of veterinary medical ethics.

I accept as a lifelong obligation the continual improvement of my professional knowledge and competence.
