Welcome from the President

Thank you for joining us at the 157th Commencement exercises of Tufts University. Commencement is the highlight of the academic year, and we welcome all our guests from across the world who have joined us for this joyous occasion.

Our more than 2,500 graduates reflect the diversity of a vibrant research university. They have pursued varied and demanding courses of study on our three Massachusetts campuses. In many cases, their academic programs also took them elsewhere, to study-abroad programs, research sites, and clinical rotations. Many have also participated actively in community, neighborhood, and public service organizations as an integral part of their education. Even as students, they have been ambassadors for Tufts and its values. As they prepare to go forth from this Hill, we look forward to their future accomplishments and to their continuing engagement as members of the university's global community of more than 100,000 alumni.

We seek Commencement speakers whose lives will inspire our graduates and model achievement for our entire community. This year's Commencement address will be delivered by Dr. Claude Steele, an insightful, rigorous, and creative social scientist who has uncovered new truths about difficult social issues. His scholarship exemplifies how academic inquiry can have profound positive impacts on society by challenging public opinions and attitudes that we encounter daily. At Tufts, we believe that this type of impact, as an extension of our teaching and research, should be at the core of higher education.

This year, the university will award honorary doctorates to Dr. Steele and five other distinguished honorees in recognition of their achievements in their chosen fields. Each of them can stand as an exemplar for our graduates. Ten members of the faculty and one dean have been named to *emeritus* status, and we will recognize their contributions to the life of the university over a remarkable total of more than 300 years of service to Tufts.

Much has changed since our first Commencement on July 8, 1857, when three students received their degrees from Tufts College, and the addresses were given in Latin. The university's commitment to education and opportunity, however, endures. We are grateful for your support as families and friends, which has been a vital part of our students' education. I know you will join me in congratulating all of them on their success at Tufts and offering them best wishes for the future.

Sincerely,

A handwritten signature in black ink that reads "Tony Monaco". The signature is written in a cursive, slightly slanted style.

Viewing the Ceremony from Indoors

Guests are invited to view the all-university ceremony from several sites around campus. These rooms will be open at 8 a.m. All are handicapped-accessible.

The following sites will be screening the ceremony:

Barnum Hall, Room 008
Cabot Intercultural Center, ASEAN Auditorium
Cohen Auditorium
Cousens Athletic Complex

Rain Plan

Regardless of weather, Phase I and indoor or tented ceremonies in Phase II will take place.
Note for Guests: Please refrain from taking photos in the stage area during the ceremonies.

Graduation Ceremonies: School of Arts and Sciences and School of Engineering

Phase II

Lunch will be served on the lawn adjacent to Tisch Library.

Africana Studies:

11:30 a.m.–1:00 p.m., ceremony in the tent on J Field, followed by lunch.

American Studies:

Dear Alma Mater

Leo R. Lewis A1887

*We con beside thy knee,
Dear Alma Mater,
Earth's book of mystery,
Dear Alma Mater,
We track the storied past,
Dear Alma Mater,
Over plains of learning vast,
Dear Alma Mater,
Speed on thy sunlit way,
Dear Alma Mater,
We vow new faith today,
Dear Alma Mater!
May glory light thy name,
Dear Alma Mater,
All thy children sing thy fame,
Dear Alma Mater, for aye!*

Tuftonia's Day

Elliot Wright Hayes A16

*Steady and true, rush along, Brown and Blue.
Raise a mighty score today.
Fearless tear down the field and never yield!
Brown and Blue, Brown and Blue for aye!
Hammer them hard, boys, and break through their guard.
That is old Tuftonia's way.
And our glorious banner once again will wave o'er
Tuftonia's Day.
T-u-f-t-s, T-u-f-t-s, Hurrah! Hurrah! for dear old Brown
and Blue!*

Refrain:

*Up on the Hill tonight all will be gay.
Victorious in the fight, we'll raise the standard of dear old
Tufts to glory!
Pile up a mighty score.
It's bound to soar.
Now one goal more!
Nothing can stop us; it's Tuftonia's Day.*

Academic Regalia

Traditional academic regalia has been worn by the Tufts faculty since the Commencement of 1906. The gown for the Bachelor's degree has pointed sleeves and is designed to be worn closed. The Master's gown has elbow-length, pointed sleeves; the Doctor's gown has bell-shaped sleeves; both may be worn open or closed. The Doctor's gown is faced, and the sleeves are trimmed with velvet. By its color and arrangement, the hood worn with the gown indicates the wearer's highest advanced degree, the field in which it was awarded, and the school from which it came. The lining of the hood carries the school's colors, brown and blue in the case of Tufts. The velvet edging on the hood, wider for the Doctor's degree than for the Master's degree, signifies by its color the field in which the degree was designated. Master of Science and Doctor of Science

hoods are trimmed in yellow; Engineering in orange; Medicine in green; Dental Medicine in lilac; Doctor of Philosophy in blue; and Veterinary Medicine in grey. The mortarboard or Oxford-type cap is the one usually worn, but of late, the soft cap, which resembles an oversized beret, has come into favor because of its comfort. Tassels, other than the universally accepted black, may indicate by the various colors the field of learning in which the degree is earned, while the gold tassel generally signifies a doctoral degree. Many foreign universities show great diversity, following traditions that extend back for centuries.

Recipients of Honorary Degrees

LOIS GIBBS is synonymous with active citizenship. She not only led her Love Canal neighborhood in New York during its infamous struggle to deal with the health issues caused by toxic waste, but continues her activism today as executive director of the Center for Health, Environment & Justice, which she founded in 1981 to assist communities facing toxic-waste hazards.

Gibbs was a housewife in Niagara Falls, New York, in 1978, and found herself taking her children to the hospital frequently for a variety of illnesses. She learned her neighbors were also struggling with unexplained illnesses, as well as mental retardation and other health problems. A survey at the time found that fifty-six percent of the children born in Niagara Falls between 1974 and 1978 had at least one birth defect. Many homeowners' basements were covered with a thick, black substance, and vegetation around the houses was dying.

Gibbs and her neighbors discovered they were living adjacent to 20,000 tons of toxic chemicals that had been dumped in the former canal their homes were built next to or around. She started demanding the federal government clean up the toxic waste, and organized her neighbors into the Love Canal Homeowners Association. It was an uphill battle. "They made me mad," she said about the government's initial refusal to help. "It wasn't a matter of, 'I'm going to go out and do good.' I was just furious and frightened."

By 1980, a presidential emergency order had declared a health crisis in Love Canal and relocated more than 800 families, reimbursing them for their homes. In response to the Love Canal disaster and the discovery of other toxic waste sites around the country, Congress passed the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, better known as the Superfund Act, to clean up such sites.

During the Love Canal crisis, Gibbs was contacted by numerous people across the country who were experiencing similar problems. Eager to find a way to help others, in 1981 she established the Center for Health, Environment & Justice, which has provided more than 11,000 grassroots groups with organizational and technical help as they contend with leaking landfills, polluted drinking water, incinerators, and hazardous waste. Gibbs frequently speaks to communities in this country and around the world about toxic chemicals and the unique vulnerability of children to environmental hazards.

She has been widely recognized for her role in the grassroots environmental health movement, and has appeared on *60 Minutes* and *The Oprah Winfrey Show*. In 1982, CBS produced a movie about her life, *Lois Gibbs: The Love Canal Story*. Gibbs has received numerous honors, including the Goldman Environmental Prize and *Outside*

Magazine's "Top Ten Who Made a Difference Honor Roll." In awarding her its prize for environmental contributions in 1998, the Heinz Foundation noted that Gibbs's message is not "not in my backyard," but rather, "not in anybody's backyard."

Gibbs will be awarded an honorary Doctor of Public Service degree.

PHILIP J. LAMPI is a man who has gone to extremes in pursuit of his passion. Working over a span of decades entirely on his own dime, he scoured the cities and towns of the United States to hunt down and painstakingly assemble the single most complete historical accounting of election records generated during the earliest days of the republic, the period from 1787 to 1825. Lampi never went to college. He had neither institutional nor family support backing him. But what he came away with at the end of his solitary labors amounted to a national treasure that the University of Texas historian Walter Dean Burnham has called "the lost Atlantis of American politics."

The source material that Lampi sought was poorly organized and loosely kept, consisting of records scattered among state and county archives, newspaper collections, assorted historical societies, and batches of private letters. Although turnout was high in early American elections, reaching seventy percent in places like New Hampshire, North Carolina, and Massachusetts, the voting process itself was elastic by modern standards.

There was no Election Day as such—more like a voting season. Citizens could vote at any time from March through early December, and the exact methods varied from state to state. Some Americans voted by voice; others by writing names on a piece of paper dropped into boxes marked "Congress," "Governor," and so on; others still by noting their preferences in open poll books. Frequently, the fragmented nature of the original record keeping made Lampi's job of summing up election results a study in exasperation. He might have to page through months of vintage newspapers before he could determine when, exactly, the voting in a given town or city had occurred. Then the task of meticulous transcription into written notes could begin. Once compiled, his detailed historic record offered a gold mine of data for historians, enabling them to analyze the demographic and geographic electoral trends of a fledgling nation.

Lampi was well-suited to working on his own. Born in Fitchburg, Massachusetts, in 1944, to a divorced mother who held two jobs and couldn't spare the time to care for him, he grew up in a series of foster homes. His longest residence was at the Stetson Home for Boys in Barre, Massachusetts, where, while still a teenager, some anomalies in accounts of U.S. presidential elections from 1824 to 1956 in various *World*

Recipients of Honorary Degrees

Almanacs caught his eye; he devoted many subsequent hours to assessing, arranging, and organizing the data from these elections. Eventually Lampi's research became focused on the years of the early republic, where there was virtually no national election data available.

Once he decided to take his obsession on the road, Lampi lived meagerly, subsisting mainly on a diet of bananas and peanut butter sandwiches and often sleeping in his car. He worked at a series of menial jobs, including a stint as a night watchman back at the Stetson School, to fund the intensive series of research jaunts he undertook between 1973 and 1988.

Now recognized as ranking among the most influential historians of early America, Philip Lampi has found a home at the American Antiquarian Society in Worcester, Massachusetts, and he lends his passion and expertise to the New Nation Votes Project, an ongoing effort to convert his extensive files into a readily accessible online database. The project is a collaborative venture between the AAS and Tufts University Digital Collections and Archives, with funding from the National Endowment for the Humanities (NEH). Last year, in a ceremony at the American Antiquarian Society, the NEH awarded Lampi its first-ever Chairman's Commendation, citing his "diligence in collecting, collating, and preserving the most basic records of American democracy."

Tufts will award Lampi an honorary Doctor of Humane Letters degree.

RAYMOND R. SACKLER, a physician, entrepreneur, and international philanthropist, is an ardent supporter of the arts and scientific research to improve the human condition. Well before multidisciplinary became a prevailing theme in academia, Sackler encouraged biomedical and physical scientists to work together to bring a broad perspective to the study and treatment of disease.

Born in Brooklyn, New York, Sackler earned an undergraduate degree from New York University. He began his medical studies at Anderson College of Medicine in Glasgow, Scotland, and, when World War II intervened, completed his M.D. in 1944 at Middlesex University School of Medicine, now the site of Brandeis University in Waltham, Massachusetts.

A board-certified psychiatrist and Distinguished Life Fellow of the American Psychiatric Association, Sackler and his two physician brothers, Arthur M. and Mortimer D. Sackler, donated the funds to establish the Sackler School of Graduate Biomedical Sciences at Tufts University, which was dedicated on October 7, 1981. In creating a home on Tufts' health sciences campus in Boston for six fledgling graduate programs in the biomedical sciences—biochemistry, immunology, molecular biology and microbiology, anatomy, pharmacology and experimental therapeutics,

and physiology—the Sacklers' vision that integration across all medical disciplines was crucial for advancing health has flourished at Tufts.

For decades, Raymond Sackler has supported endeavors in theoretical and applied research in the fields of mathematics, physics, astronomy, chemistry, and biomedicine through research grants, lectureships, professorships, and institutional support at many of the leading universities and academic medical centers around the world. He established the Raymond and Beverly Sackler International Prizes in the Physical Sciences and in Biophysics to recognize exceptional scientists.

Internationally, Sackler and his wife, Beverly, have supported science and the arts at Cambridge University (England), Cardiff University (Wales), the Institut des Hautes Études Scientifiques (France), Leiden University (Netherlands), Niels Bohr Institute at the University of Copenhagen (Denmark), Tel Aviv University (Israel), University of Oslo (Norway), the Israel Museum, and the Louvre, among others. In 2008, the Raymond and Beverly Sackler U.S.-U.K. Scientific Forum was endowed to promote a bilateral scientific forum that is jointly run by the National Academy of Sciences in the United States and the Royal Society in London.

For their support of the arts, the Sacklers have been recognized by the British Museum with the naming of the Raymond and Beverly Sackler Wing of Ancient Near East and Egypt and, with his two brothers, the Sackler Wing at the Metropolitan Museum of Art in New York City, which houses the Temple of Dendur and study centers for Chinese and Japanese art history.

Among his many other honors, Sackler is a Chevalier de la Légion d'honneur and an Officer in the Order of Orange Nassau, the Netherlands, and was knighted by Queen Elizabeth II as a Knight Commander of the British Empire. In tribute to Raymond and Beverly Sackler's generous support of research in astrophysics and astronomy, Asteroid 7690 Sackler was named in their honor in a joint citation by the Harvard-Smithsonian Center for Astrophysics and the Leiden University Observatory.

Tufts will award him an honorary Doctor of Humane Letters degree.

RAM SHRESTHA served for more than two decades as an executive director of the Nepali Technical Assistance Group (NTAG), a nonprofit organization he founded in 1995 to improve maternal and infant health in his native Nepal.

After earning a master's degree in international nutrition from the Friedman School of Nutrition Science and Policy at Tufts University in 1990, Shrestha returned to Nepal, a nation where more than fifteen percent of children do not live to see their fifth birthdays. Poor nutrition, particularly

Recipients of Honorary Degrees

vitamin A deficiency, was identified as a major contributor to the unacceptably high rate of child mortality. Vitamin A deficiency also causes night blindness in expectant mothers and blindness in infants and children.

Working to support the Nepalese government's National Vitamin A Program funded by USAID and UNICEF, Shrestha came up with a novel way to distribute the much-needed supplement of vitamin A across the mountainous country. Using creative and innovative participatory training methods, Shrestha was able to motivate Female Community Health Volunteers (FCHVs) throughout the country to distribute vitamin A capsules and provide nutrition education programs to the mothers.

He used his deep knowledge of Nepali culture to make the volunteers' efforts visible, even glamorous. The FCHVs were issued green tote bags emblazoned with the program's logo, and Shrestha made sure that when he visited individual volunteers, he had a government official or other funding agency official in tow. The communities became intrigued with and engaged in the vitamin A program through the creative use of magic shows that promoted consumption of locally available vitamin A-rich foods. Shrestha introduced the idea of creating long-term incentives for volunteers by convincing local government to establish FCHV endowment funds that the volunteers managed to support their work.

The FCHVs, invested in the health of their families and communities, succeeded where outsiders had earlier failed. By 2007, ninety-five percent of all young Nepali children were receiving vitamin A supplements twice each year, in April and in October. Today in Nepal, more than 50,000 FCHVs deliver supplements to 3.7 million children annually. A significant result of this program is the fact that these 50,000 volunteers have been now actively involved in community-based programs for twenty years. This involvement has resulted in these FCHVs gaining a great deal of confidence and stature in their communities, enabling them to contribute to a wide range of other activities in their communities.

The Nepali Technical Assistance Group has leveraged the network of volunteers to distribute other remedies, including iron supplements, deworming medication, and antibiotics, to treat common, preventable ailments in Nepali children. The government is also using the community volunteer model to distribute health information: A current effort seeks to increase reproductive health literacy among teenaged girls. These community-based intervention programs save an estimated 20,000 lives each year. Child mortality has been cut in half over the past twenty years. Vitamin A-related eye disease among pregnant women, who also receive the nutrition education about vitamin-rich animal foods has fallen, too.

Efficient, sustainable, and low-cost, Shrestha's innovative Female Community Health Volunteer model has been widely recognized as a best practice for community-based nutrition and medical interventions. He has lent his expertise with the model to projects in Indonesia, Cambodia, Vietnam, India, Bangladesh, Lesotho, and Afghanistan, and is currently supporting a University Research Co., LLC–USAID project to expand the model in Ethiopia, Uganda, and Tanzania to empower existing community groups to improve their own health. Shrestha is the author of numerous peer-reviewed studies about maternal and childhood nutrition and disease. In a landmark study he published in the *American Journal of Clinical Nutrition* in 2007, it was shown that iron and riboflavin supplements enhance the effectiveness of vitamin A in reversing night blindness.

In 2000, Shrestha received the Global Health Council's International Award for Best Practices in Global Health. In 2005 he was named to *Time* magazine's list of Global Health Heroes and in 2006 he was honored with the Friedman School Alumni Association's Frontline Award for his innovative work in nutrition. He was also conferred a Prabal Gorkha Dakchhin Bahu Award by His Majesty's Government of Nepal in 2005.

Shrestha will receive an honorary Doctor of Science degree.

CLAUDE M. STEELE begins his book, *Whistling Vivaldi: How Stereotypes Affect Us and What We Can Do*, with a story about how he first became aware he was African American.

He was in the second or third grade, walking home with his friends after the last day of school. They complained they couldn't go swimming in the pool that was just three blocks away. It was in a white neighborhood, and blacks were only allowed in on Wednesday afternoons. That would be the only time they could swim during the long summer.

Such realizations, he came to recognize, make the consequences of stereotypes concrete, not abstract. Stereotyping, he would come to discover, also influences performance and identity.

Over two decades, Steele, the I. James Quillen Dean of the School of Education at Stanford University, has researched the myriad ways negative stereotypes have influenced academic, professional, and personal performance. Most importantly, he has helped develop strategies for overcoming the damaging behavior that stereotypes can cause. For this and other work on the psychological experience of the individual, Steele is recognized as a leader in the field of social psychology and for his commitment to the systematic application of social science to problems of societal significance.

While Steele's early work focused on why African American and other minority students seemed to do poorly at large institutions of higher education such as the University of Michigan and Stanford, he found that there is

Recipients of Honorary Degrees

no group—young, old, Northerners, Southerners, WASPs, Californians—that doesn't have at least some negative stereotype associated with it.

Through rigorous testing, Steele saw that the pressure to overcome a stereotype, such as the notion that women are poor at math or Asians will outperform white males, affects cognitive performance. The work allowed Steele to refute the prevailing notion of the 1990s that the problem of academic underperformance among African Americans stemmed from the black students themselves and such issues as poor motivation, lack of family values, or social and economic deprivation. Instead, he found that black students, minorities, women, and others would test on par with their traditionally more successful white male counterparts if language that triggered a stereotype were removed from the test instructions.

Prior to leading the Stanford School of Education, Steele was provost of Columbia University and a professor of psychology there. Before that he was the Lucie Stern Professor in the Social Sciences at Stanford and director of the university's Center for Comparative Studies in Race and Ethnicity and its Center for Advanced Study in the Behavioral Sciences. He was educated at Hiram College and at Ohio State University, where he received a Ph.D. in psychology in 1971.

Steele has been elected to the National Academy of Sciences, the National Academy of Education, the American Academy of Arts and Sciences, and the American Philosophical Society. He is a board member of the Social Science Research Council and the John D. and Catherine T. MacArthur Foundation. He has received numerous fellowships and awards, including the William James Fellow Award for Distinguished Scientific Career Contribution from the American Psychological Society.

Steele will be awarded an honorary Doctor of Humane Letters degree.

Some have called **ASO TAVITIAN**'s story a tale straight from a Dickens novel. At age nineteen, he left communist Bulgaria and made his way to Beirut, Lebanon. Three months later, after a local high school teacher he met thought he was English, Tavitian was accepted at Haigazian College and awarded a full scholarship. He almost turned down the opportunity because he couldn't afford the living expenses. Fate had other plans.

A donor who insisted on anonymity offered to cover his living expenses. It wasn't until he left Beirut a year later that he learned that his benefactor was the teacher who had thought he was English.

"That obviously had a great impact on me," says Tavitian. "My teacher was a man of very modest means, and his desire that I not be told is the ultimate in giving."

The gift not only changed Tavitian's life, it inspired his own lifelong philanthropy in education and the fine and performing arts.

After a year at Haigazian, he moved to the United States to attend Columbia University, where he earned an M.S. in nuclear engineering. Soon afterwards he cofounded Syncsort, which, in the late 1960s, was one of the first companies to sell standalone software, a move that launched the era of software as a commodity independent of hardware. Tavitian served as CEO of Syncsort from 1975 to 2008, and is now a member of its board of directors.

A privately held technology company operating in the field of Big Data, Syncsort produces data-protection software as well as resource-efficient data integration software. With headquarters in the United States and subsidiaries in Germany, France, the Netherlands, and the United Kingdom, Syncsort's products are deployed in seventy countries.

Tavitian says he views success not as an end in itself, but as a means to advance causes he considers important. In memory of the teacher who financed his education, the Tavitian Foundation, of which he is president, has awarded numerous university scholarships, with a preference given to students of Armenian and Bulgarian descent. The foundation funds the Tavitian Scholarship Program at the Fletcher School at Tufts University, a six-month training program for Armenian mid-career diplomats and government officials. One Fletcher student in the program said she was moved by Tavitian's generosity: "As Armenians, we are very proud there is such a person. Because of the education he received, he promised he would support people in the future. Our students, if someday they have a chance to support someone's education, will do the same with great pleasure."

He also founded and supports the Tavitian Library at the Armenian Ministry of Foreign Affairs, a collection focusing on international relations, diplomacy, world history, and the history of Armenia and the Caucasus. Tavitian's concern for global peace and prosperity was recognized in 2010 when he was appointed to the board of trustees of the Carnegie Endowment for International Peace.

Tavitian, who lives in New York City and Stockbridge, Massachusetts, is equally active and highly regarded in the arts communities. He is on the boards of the Frick Collection and Close Encounters with Music. He is also a member of the board of governors of the New School for Social Research; a member of the board of the French American Cultural Exchange, a nonprofit that fosters French-American relations; and vice chair of the board of trustees of the Austen Riggs Center, a nonprofit psychiatric hospital in Stockbridge, Massachusetts.

Tufts will award Tavitian a Doctor of Public Service degree.

Order of Events

Undergraduate and graduate students in the School of Arts and Sciences participate in department ceremonies. The School of Engineering holds one ceremony for all graduating students. Each celebration has a unique order of events that reflects the character of the departments involved.

We invite you to enjoy the ceremonies (see page eight). The recognition of our students is well deserved. We congratulate all of our graduates for their academic achievement and wish them well in the future.

Ceremony Hosts

John Barker, *Dean of Undergraduate and Graduate Students for the School of Arts and Sciences and the School of Engineering*

Nancy Bauer, *Dean of Academic Affairs for the School of Arts and Sciences*

Joanne Berger-Sweeney, *Dean, School of Arts and Sciences*

James M. Glaser, *Dean of Academic Affairs for the School of Arts and Sciences*

Carmen Lowe, *Dean of Academic Advising and Undergraduate Studies*

Lynne Pepall, *Dean, Graduate School of Arts and Sciences*

Bruce Reitman, *Dean of Student Affairs for the School of Arts and Sciences and the School of Engineering*

Diane Souvaine, *Vice Provost for Research*

School of Engineering

Candidates for Graduate Degrees

Doctor of Philosophy

Ali Boroumand

Civil and Environmental Engineering
B.S., Isfahan University of Technology, Iran
M.S., Iran University of Science & Technology
Dissertation: An Assessment of the Kinetic Component
Partitioning in DNAPL Source-Zones; Modeling Techniques and
Applications
Advisor: Dr. Linda Abriola

Matthew B. Boucher

Chemical Engineering
B.S., University of Connecticut
M.E., University of Connecticut
Dissertation: Bridging the Gap: From Model Surfaces to
Nanoparticle Analogs for the Selective Oxidation and Steam
Reforming of Methanol and for Selective Hydrogenation Catalysis
Advisor: Dr. Maria Flytzani-Stephanopoulos

Jeffrey P. Brown

Biomedical Engineering
B.S., United States Merchant Marine Academy
M.S., Arizona State University
Dissertation: Investigating Tendon and Ligament Development in
Order to Inform a Tissue Engineering Strategy
Advisor: Dr. Catherine Kuo

Noah Manus Daniels

Computer Science
B.S., Tufts University
M.S., Tufts University
Dissertation: Remote Homology Detection in Proteins Using
Graphical Models
Advisor: Dr. Lenore Cowen

Almir D. Davis***

Electrical Engineering
B.S., Northeastern University
M.S., Northeastern University
Dissertation: PEWSN: Power Equilibrium Wireless Sensor Network
Advisor: Dr. Hwa Chang

Yongxuan Gao*

Civil and Environmental Engineering
B.S., Tufts University
M.E., Massachusetts Institute of Technology
Dissertation: Hydraulic, Ecologic, and Livelihood Impact
Assessment of a Systems of Small Reservoirs in Ghana
Advisor: Dr. Richard Vogel

Nicholas A. Guziewicz**

Biomedical Engineering
B.A., College of the Holy Cross
Dissertation: Silk Lyogels for Sustained Local Delivery of
Therapeutic Antibodies
Advisor: Dr. David Kaplan

Bertan Hallacoglu

Biomedical Engineering
B.S., Wentworth Institute of Technology
M.S., Tufts University
Dissertation: Noninvasive Absolute Cerebral Oximetry with
Frequency-Domain Near-Infrared Spectroscopy
Advisor: Dr. Sergio Fantini

Byeongju Jung

Civil and Environmental Engineering
B.S., Seoul National University, Republic of Korea
M.S., Seoul National University, Republic of Korea
M.A., Johns Hopkins University
Dissertation: The Geohydrology of Multiphase Flow and Petroleum
Migration in Faulted Sedimentary Basins
Advisor: Dr. Grant Garven

James Kaklamanos**

Civil and Environmental Engineering
B.S., Tufts University
M.S., Tufts University
Dissertation: Quantifying Uncertainty in Earthquake Site Response
Models Using the KiK-net Database
Advisor: Dr. Laurie Baise

Fridrik Larusson***

Electrical Engineering
B.S., University of Iceland
M.S., Tufts University
Dissertation: Shape-based Image Reconstruction Methods for
Hyperspectral Diffuse Optical Tomography
Advisor: Dr. Eric Miller

Reynald M. Lescarbeau

Biomedical Engineering
B.S., Rensselaer Polytechnic Institute
Dissertation: *In Vitro* and Quantitative Phosphoproteomic
Modeling of Castration Resistant Prostate Cancer
Advisor: Dr. David Kaplan

Joseph Edward Marturano***

Biomedical Engineering
B.S., Worcester Polytechnic Institute
Dissertation: Characterization of Embryonic Tendon Mechanical
and Biochemical Properties to Inform Tendon Differentiation,
Development, and Scaffold Design
Advisor: Dr. Catherine Kuo

Francesco Q. Pancheri

Mechanical Engineering
B.S., Worcester Polytechnic Institute
M.S., Worcester Polytechnic Institute
Dissertation: Experimental and Analytical Aspects of Biological
and Engineered Materials Subjected to Planar Biaxial Loading
Advisor: Dr. Luis Dorfmann

School of Engineering

Candidates for Graduate Degrees

Frank J. Saunders***

Mechanical Engineering
B.S., University of Massachusetts Amherst
M.S., Tufts University
Dissertation: Embedding Desired Dynamics into Physical and Control Parameters of a Mechanical System
Advisor: Dr. Jason Rife

George Saveriades

Electrical Engineering
B.S.E.E., Tufts University
B.S., Tufts University
M.S., Tufts University
Dissertation: The Effects of Magnetic Exposure on the Nervous System: A Study on the Effects of Low-Strength Low-Frequency Magnetic Fields on Neurotransmitter Exocytosis and Cell Viability Through Ionic Cyclotron Resonance Frequency
Advisor: Dr. Joseph Noonan

Oguz Semerci***

Electrical Engineering
B.S., Istanbul Technical University, Turkey
M.S., Istanbul Technical University, Turkey
Dissertation: Image Formation Methods for Dual Energy and Multi-Energy Computed Tomography
Advisor: Dr. Eric Miller

Corey M. Shemelya

Electrical Engineering
B.S., Allegheny College
M.S., Tufts University
Dissertation: Photonics: Photodiodes and Metamaterials for Thermophotovoltaics and Photodetection Applications
Advisor: Dr. Thomas Vanderveelde

Minchul Shin*

Mechanical Engineering
B.E., Kyungpook National University, Republic of Korea
M.E., University of Alabama at Birmingham
Dissertation: MEMS Based Doppler Velocity Measurement System
Advisor: Dr. Robert White

Jesse D. Sipple

Civil and Environmental Engineering
B.S., University of New Hampshire
M.S., University of New Hampshire
Dissertation: Frequency Response Function Based Finite Element Model Updating
Advisor: Dr. Masoud Sanayei

Joel A. Spencer*

Biomedical Engineering
B.S., University of California at Irvine
Dissertation: Characterization of Bone Marrow pO₂ by Two-Photon Phosphorescence Quenching Method
Advisor: Dr. Mark Cronin-Golomb

Gautham V. Sridharan

Chemical Engineering
B.S., Cornell University
Dissertation: Modularity Analysis of Metabolic Networks Based on Shortest Retroactive Distances (ShReD)
Advisor: Dr. Kyongbum Lee

Amir Taghavy

Civil and Environmental Engineering
B.S., Amirkabir University of Technology, Iran
M.S., Sharif University of Technology, Iran
Dissertation: Fate and Transport of Nanoparticles in Porous Media: A Numerical Study
Advisor: Dr. Linda Abriola

Brian F. Thomas*

Civil and Environmental Engineering
B.S., University of North Dakota
M.S., University of New Hampshire
Dissertation: Multivariate Analysis to Assess Hydromorphic Response of Groundwater and Surface Water Systems
Advisor: Dr. Richard Vogel

Amelio Vazquez-Reina*

Computer Science
B.S., Universidad de Alcalá, Spain
M.S., Universidad de Alcalá, Spain
Dissertation: Segmentation Strategies for Connectomics
Advisor: Dr. Eric Miller

Byron C. Wallace*

Computer Science
B.S., University of Massachusetts Amherst
M.S., Tufts University
Dissertation: Machine Learning in Health Informatics: Making Better Use of Domain Experts
Advisor: Dr. Carla Brodley

Yue Wu*

Electrical Engineering
B.E., Huazhong University of Science & Technology, China
M.S., University of Toledo
Dissertation: The Sudoku Array and Its Applications in Information Security
Advisor: Dr. Joseph Noonan

Wangren Xu

Electrical Engineering
B.E., Dong Hua University, China
M.S., Royal Institute of Technology, Sweden
Dissertation: Metamaterials with Active Circuits
Advisor: Dr. Sameer Sonkusale

School of Engineering

Candidates for Graduate Degrees

Joanna F. Xylas

Biomedical Engineering
B.A., Tufts University
Dissertation: Shedding Light on Cancer: The Utility of Nonlinear Microscopy for Assessing and Detecting Events Associated with Cancer Initiation
Advisor: Dr. Irene Georgakoudi

Cuixian Yang***

Chemical Engineering
B.E., Xiamen University, China
M.E., Xiamen University, China
Dissertation: Viral-Templated Palladium Nanocatalysts
Advisor: Dr. Hyunmin Yi

Master of Engineering**David Agnello**

Civil and Environmental Engineering

A Modern Hippocratic Oath

By Louis Lasagna, M.D.,

Dean Emeritus, Sackler School of Graduate Biomedical Sciences

I swear to fulfill, to the best of my ability and judgment, this covenant:

I will respect the hard won scientific gains of those physicians in whose steps I walk, and gladly share such knowledge as is mine with those who are to follow.

I will apply, for the benefit of the sick, all measures, which are required, avoiding those twin traps of over treatment and therapeutic nihilism.

I will remember that there is art to medicine as well as science, and that warmth, sympathy, and understanding may outweigh the surgeon's knife or the chemist's drug.

I will not be ashamed to say, "I know not," nor will I fail to call in my colleagues when the skills of another are needed for a patient's recovery.

I will respect the privacy of my patients, for their problems are not disclosed to me that the world may know. Most especially must I tread with care in matters of life and death.

If it is given to me to save a life, all thanks. But it may also be within my power to take a life; this awesome responsibility must be faced with great humbleness and awareness of my own frailty. Above all, I must not play at God.

I will remember that I do not treat a fever chart, or a cancerous growth, but a sick human being, whose illness may affect the person's family and economic stability. My responsibility includes these related problems, if I am to care adequately for the sick.

I will prevent disease whenever I can, for prevention is preferable to cure.

I will remember that I remain a member of society, with special obligations to all my fellow human beings, those sound of mind and body, as well as the infirm.

If I do not violate this oath, may I enjoy life and art, respected while I live and remembered with affection thereafter.

May I always act so as to preserve the finest traditions of my calling and may I long experience the joy of healing those who seek my help.

Candidates for Degrees

An Oath for the Dental Graduate

I solemnly pledge to devote my efforts to the care of my patients.

As a member of society, with special obligations, I will treat all patients without prejudice, incorporating the knowledge and skills instilled in me by my teachers.

I will practice dentistry in an ethical and professional manner.

I will hold in confidence all matters related to them.

I will not hesitate to call upon my colleagues when their knowledge and skills are needed.

I will make every effort to maintain, contribute to, and enhance the quality of the dental profession.

I will constantly keep in mind that the practice of dentistry is a true mingling of science, technology, and caring.

Veterinarian's Oath

Being admitted to the profession of veterinary medicine,
I solemnly swear to use my scientific knowledge and skills for
the benefit of society through the protection of animal health
and welfare, the prevention and relief of animal suffering, the
conservation of animal resources, the promotion of public health,
and the advancement of medical knowledge.

I will practice my profession conscientiously, with dignity, and in
keeping with the principles of veterinary medical ethics.

I accept as a lifelong obligation the continual improvement of my
professional knowledge and competence.
