## Welcome from the President

Commencement is the high point of the academic year and has always been a special day at Tufts. It gives me immense pleasure to be able to celebrate this day with you in person and welcome all our graduates and their family and friends for this annual celebration.

After a period of rigorous study, intellectual pursuit, and personal growth, our students stand ready to graduate from their respective academic programs and this great university. Today, we celebrate their achievements and recognize all those who have helped make this day possible.

I do not need to remind you of the challenges these past two years have brought for our graduates. They have navigated changing guidelines and varied forms of instruction; practiced personal discipline amidst restrictive recommendations; and overcome bouts of loneliness and mental fatigue. However, through it all, they have shown grace, flexibility, and strength, which have led them to the triumph of this day.

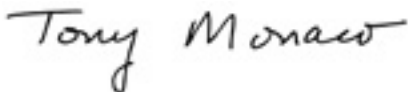

As we confer their degrees today, it is important to recognize the role of all those who have supported our students to reach this moment of success during a particularly trying time. The family members, friends, faculty, and staff who have all worked together to ensure that these graduates were well-equipped to traverse the myriad challenges in their path during their entire time at Tufts deserve our thanks and appreciation.

Our graduates today arrived at Tufts with diverse backgrounds, perspectives, and experiences. As they pursued rigorous courses of study, they also acted as agents of social change who have left their mark on this university. As they depart our campuses, I am confident that each one of our graduates will positively impact our society and the world.

Finally, I would be remiss if I did not acknowledge the high standards today's graduates have set during their time at Tufts. Their resourcefulness in solving challenges and navigating unforeseen circumstances, caring for and picking each other up, and fighting for the rights of all those who are marginalized in our society has set the bar high for future generations of students. We are proud of you and how you have lived your lives as members of the Tufts community.

Congratulations to our graduates. I wish all of you the very best and look forward to welcoming you back on campus as alumni.

Sincerely,

A handwritten signature in cursive script that reads "Tony Monaco".

## University Commencement

Dear Alma Mater

### Leo R. Lewis A1887

*We con, beside thy knee,  
Dear Alma Mater,  
Earth's book of mystery,  
Dear Alma Mater.  
We track the storied past,  
Dear Alma Mater,  
Over plains of learning vast,  
Dear Alma Mater!  
Speed on thy sunlit way,  
Dear Alma Mater,  
We vow new faith today,  
Dear Alma Mater!  
May glory light thy name,  
Dear Alma Mater,  
All thy children sing thy fame,  
Dear Alma Mater, For aye!*

### Academic Mace

Ceremonial maces were originally carried as a symbol of royal authority, dating back to the Middle Ages. The academic mace is a symbol of the authority invested in the president by the university's governing body. Tufts' mace is adorned with a medallion engraved with the official seal of the university and is carried before the president in academic processions in formal ceremonies such as commencement and inaugurations.

### Academic Regalia

Traditional academic regalia has been worn by the Tufts faculty since the Commencement of 1906. The gown for the bachelor's degree has pointed sleeves and is designed to be worn closed. The master's gown has elbow-length, pointed sleeves; the doctor's gown has bell-shaped sleeves; both may be worn open or closed. The doctor's gown is faced, and the sleeves are trimmed with velvet. By its color and arrangement, the hood worn with the gown indicates the wearer's highest advanced degree, the field in which it was awarded, and the school from which it came. The lining of the hood carries the school's colors, brown and blue in the case of Tufts. The velvet edging on the hood, wider for the doctor's degree than for the master's degree,

Tuftonia's Day

### Elliot Wright Hayes A1916

*Steady and true, rush along, Brown and Blue.  
Raise a mighty score today.  
Fearless tear down the field and never yield!  
Brown and Blue, Brown and Blue for aye!  
Hammer them hard, boys, and break through their guard.  
That is old Tuftonia's way.  
And our glorious banner once again will wave o'er  
Tuftonia's Day.  
T-u-f-t-s, T-u-f-t-s, Hurrah! Hurrah! for dear old Brown  
and Blue!*

*Refrain:  
Up on the Hill tonight all will be gay.  
Victorious in the fight, we'll raise the standard of dear old  
Tufts to glory!  
Pile up a mighty score.  
It's bound to soar.  
Now one goal more!  
Nothing can stop us; it's Tuftonia's Day.*

The mahogany stand displaying the mace was designed and built by students from Medford Vocational Technical High School and was presented to President Monaco in April 2015.

signifies by its color the field in which the degree was designated. Master of science and doctor of science hoods are trimmed in yellow; engineering in orange; medicine in green; dental medicine in lilac; doctor of philosophy in blue; and veterinary medicine in gray. The mortarboard or Oxford-type cap is the one usually worn, but of late, the soft cap, which resembles an oversized beret, has come into favor because of its comfort. Tassels, other than the universally accepted black, may indicate by the various colors the field of learning in which the degree is earned, while the gold tassel generally signifies a doctoral degree. Many foreign universities show great diversity, following traditions that extend back for centuries.

## Recipients of Honorary Degrees

An accomplished journalist, commentator, and storyteller, **CALLIE CROSSLEY** is the host of the radio show and podcast “Under the Radar with Callie Crossley,” which airs each Sunday on GBH Radio. She hosts “Basic Black” on GBH-TV, which focuses on current events impacting communities of color. And each Monday, her essays from her award-winning radio series air during GBH’s “Morning Edition.” Crossley is a frequent commentator on local and national television and radio programs and has been quoted in a variety of publications, including *The Washington Post* and *Vanity Fair*. She was the subject of a major feature published in the August 2021 edition of *Boston Magazine*.

A former producer for the ABC News show “20/20,” Crossley is a Council of Independent Colleges Visiting Fellow (formerly Woodrow Wilson Visiting Fellow). In this capacity, she guest lectures at colleges and universities about media literacy, media, and politics, and the intersection of race, gender, and media.

Crossley has won multiple TV, radio, and film awards, including the prestigious duPont-Columbia Gold Baton award and an Academy Award nomination for her work as producer on the documentary series “Eyes on the Prize: America’s Civil Rights Years.” She has also earned top honors for both her commentary and hosting/ interviewing talent, including local and national Emmys, and awards from the Associated Press, the Edward R. Murrow and Clarion organizations, and the Public Media Journalists Association.

Crossley has been honored with many community awards, including, most recently, the 2019 Yankee Quill Award from the New England Newspaper & Press Association, the 2019 Justice in Action Award from Jane Doe Inc., and Get Konnected!’s 2021 50 Most Impactful Black Women. She is also featured in the 2011 book, *Boston, Inspirational Women* (Three Bean Press), co-authored by award-winning photographers Bill Brett and Kerry Brett, with Carol Beggy.

She was both a Nieman Fellow and an Institute of Politics Fellow at Harvard University. In 2013, she was honored as a distinguished alumna of Wellesley College and was named to Wellesley’s Board of Trustees in 2017. Crossley holds three honorary degrees, from Wheaton College, Pine Manor College, and Cambridge College.

Crossley will receive an honorary Doctor of Humane Letters degree.

The sculptures of **PABLO EDUARDO**, A94, embrace his Spanish-American heritage while marrying decades of training with an intimate understanding of his craft. The artwork of the Bolivian-born sculptor captures a snapshot of artistic metamorphosis as it simultaneously celebrates rhythm, emotion, texture, and tension. His distinctive style creates compelling pieces of contemporary art—and its Baroque influences converse with the past. He deftly captures balance and precise movement, both physically and emotionally, to reveal a transcendent artistic experience for the viewer.

Eduardo attended the School of the Museum of Fine Arts, Boston, and earned his bachelor’s degree in fine arts from Tufts in 1994. As an undergraduate, he learned about the body’s potential for artistic manifestation and honed his understanding of the human form by studying anatomy at Tufts University School of Medicine. Today, he unifies the disciplines of art and anatomy with an intimate sense of natural dynamism in each sculpture, elegantly deconstructing his subjects—and then resurrecting them in bronze.

For almost 30 years, Eduardo has been a significant contributor to public art in the United States and internationally. Although he has a vast collection of public works in the Republic of Bolivia, his foremost collection of public art is in the United States. Among his recent notable North American installations are the Boston Marathon Bombing Memorial and the statue of Henri Termier in Cambridge, Mass. There is also a 10-foot interactive bronze sculpture of former Boston Mayor Kevin White prominently featured in Faneuil Hall. His 15-foot St. Ignatius of Loyola sculpture at Boston College celebrates a harmonious marriage between aesthetic and spiritual renewal.

In 2007, Eduardo was chosen to sculpt César Chávez as the first monument to a Hispanic person to be installed on the University of Texas at Austin campus. On his commission for the civil rights leader’s sculpture, Eduardo reflected, “I am truly honored to have the opportunity to sculpt the journey of one of my personal heroes. When I was growing up as an exile, my family looked up to him as an example of tenacity and resilience. This concept of adaptability and innovation had a direct impact on my own creative revolution. It has been the cornerstone of my artistic approach.”

Eduardo will receive an honorary Doctor of Fine Arts degree.

## Recipients of Honorary Degrees

The leadership of **JANE FROMMER**, J76, and the impact of her discoveries illustrate there is a role for nontraditional pathways through science. Her ease in crossing boundaries between disciplines began at the Experimental College at Tufts, with coursework ranging over an unlikely combination of transformational linguistics, Soviet studies, mythology in art, and teaching English to Portuguese-speaking campus staff. As a path-breaking scientist, so too has she moved comfortably among roles: as visiting faculty in Brazil, Switzerland, Japan, and France; principal investigator at IBM Research; National Science Foundation advisor; American Chemical Society (ACS) organizer; and collaborator-mentor to students and scientists worldwide in the emerging field of nanotechnology.

A highlight of Frommer's career is her groundbreaking research on the nanoscale—before the term nanotechnology was even coined—and its application to practical real-world problems of importance to research, development, and manufacturing quality. Her knowledge of organic chemistry and molecular behavior broadened the impact of nanoscale characterization, which is now required instrumentation in materials science research facilities worldwide. Her blend of fundamental and applied studies on the molecular underpinnings of material behavior in interdisciplinary spaces between chemistry, physics, and engineering drew into her lab a flow of students, visiting scientists, and collaborative startups. By hosting a steady stream of collaborators with her lab's tools and techniques, she provided a “nanolab” model for those scientists establishing their own in-house facilities. Working together, they contributed to an international effort that laid the groundwork for nanoscience.

Since leaving IBM in 2018, Frommer has been engaged as an advisor to Google in efforts to make vast troves of molecular data available to scientists and the public. She also advises both startups and established companies in Silicon Valley in the areas of instrumentation, characterization, and nanomaterials. She plays an active role in the Silicon Valley ACS, serving as chair in 2016 and currently acting as a councilor with a focus on updating ACS relevance for young professionals. A devoted mentor at the high school, college, postgraduate, and early professional levels, Frommer lectures at universities and guest teaches at selected high schools with high minority populations. She established research internship programs for students who are the first in their families to attend college.

In addition to her bachelor of science degree in chemistry from Tufts (with undergraduate research at MIT), she holds a Ph.D. in organometallic chemistry from Caltech. She has more than 100 publications in refereed journals, 14 refereed book chapters, and more than 50 patents. In 2015, she was inducted as an ACS Fellow, and in 2017, she received the ACS Award in Industrial Chemistry. In 2020, she received the Perkin Medal for her pioneering work on materials at the nanoscale.

Frommer will receive an honorary Doctor of Science degree.

Numerous leadership roles—including his service as a dean for three universities—have been part of **LONNIE KING**'s distinguished global career in animal and public health. He has served most recently as the interim dean of the College of Food, Agricultural, and Environmental Sciences at The Ohio State University, where he also served as the vice president for agriculture. At Ohio State, King held the Ruth Stanton Endowed Chair and served as executive dean for the university's seven health science colleges and as dean of the College of Veterinary Medicine.

Before Ohio State, King was the first director of what is now the National Center for Emerging and Zoonotic Infectious Diseases at the Centers for Disease Control and Prevention. There, he led activities for surveillance, diagnostics, disease investigations, epidemiology, research, public education, policy development, and disease prevention and public health concerns. Before serving as director, he was the first chief of the agency's Office of Strategy and Innovation.

At Michigan State University's College of Veterinary Medicine in the late 1990s, King led the college's academic programs, research, teaching hospital, Diagnostic Center for Population and Animal Health, basic and clinical science departments, and outreach and continuing education programs. He was also professor of large animal clinical sciences and a distinguished university professor.

In 1992, King was appointed administrator for the U.S. Department of Agriculture's Animal and Plant Health Inspection Service, where he worked to ensure the health and care of animals and plants, improve agricultural productivity and competitiveness, and contribute to the national economy and public health. For five years, King served as the country's chief veterinary officer, working extensively in global trade and closely with the World Organisation for Animal Health.

## Recipients of Honorary Degrees

King received his bachelor of science and doctor of veterinary medicine degrees from The Ohio State University, his master of science in epidemiology from the University of Minnesota, and his master's degree in public administration from American University. He is a board-certified member of the American College of Veterinary Preventive Medicine and has completed the Senior Executive Fellows program at Harvard University. He was elected to the National Academy of Medicine of the National Academy of Science in 2004. He has received the Global One Health Award from the World Small Animal Veterinary Medical Association and the Meritorious Service Award from the World Organisation for Animal Health. He has recently completed his term as vice chair for the Presidential Advisory Council on Combating Antibiotic-Resistant Bacteria and continues his research and programs to advance the science of the CDC's One Health program.

King will receive an honorary Doctor of Science degree.

Award-winning historian and author **ERIKA LEE**, J91, is Regents Professor of History and Asian American Studies and director of the Immigration History Research Center at the University of Minnesota. The granddaughter of Chinese immigrants, Lee grew up in the San Francisco Bay Area before attending Tufts and later receiving her Ph.D. from the University of California, Berkeley.

Today, she is one of the nation's leading immigration and Asian American historians. She has received grants and fellowships from the National Endowment for the Humanities and the Social Science Research Council, and was the recipient of the Andrew Carnegie Fellowship (also known as the nation's "Brainy Award"). She is the author of four award-winning books, including *At America's Gates: Chinese Immigration during the Exclusion Era, 1882–1943* (University of North Carolina Press); *Angel Island: Immigrant Gateway to America* (co-authored with Judy Yung, Oxford University Press); and *The Making of Asian America: A History* (Simon & Schuster). The last was the recipient of the 2015 Asian/Pacific American Award for Literature from the Asian Pacific American Librarians Association and was named an Editor's Choice by *The New York Times* and one of the Best Nonfiction Books of 2015 by *Kirkus Reviews*.

Lee's newest book is *America for Americans: A History of Xenophobia in the United States* (Basic Books). Called an "essential reading" by Ibram X. Kendi, *America for Americans* won the American Book Award and the

Asian/Pacific American Award for Literature. Named to best books lists by *Time*, *USA Today*, and *Ms. Magazine*, it was highlighted by *The Washington Post*, *The New York Times*, and the New York Public Library as one of the most important books illuminating the Trump era and informing essential issues in the 2020 election.

At the Immigration History Research Center, Lee co-founded and directs several digital humanities projects, including the *Immigrant Stories Project*, which works with recent immigrants and refugees to collect, preserve, and share their experiences; the #ImmigrationSyllabus, a digital educational resource offering historical perspectives to contemporary immigration debates; and *Immigrants in COVID America*, a publicly accessible resource exploring the impact of the pandemic on immigrants and refugees in the United States.

Known for her advocacy work as well as her scholarship, Lee has received numerous honors and awards, including the Asian Pacific American Advocates Pioneer Award and the Immigrant Heritage Award from the Angel Island Immigration Station Foundation. She was recently elected president of the Organization of American Historians, is a member of the American Academy of Arts and Sciences, and has testified before Congress in its historic hearings on anti-Asian discrimination and violence.

Lee is a regular commentator in the media, including featured interviews in PBS' "Asian Americans" and "The Chinese Exclusion Act," in the History Channel's "America: Promised Land," and on Bill Moyer's "Becoming American: The Chinese Experience." Her opinion pieces have been published in *The Washington Post*, the *Los Angeles Times*, and *Time*.

Lee will receive an honorary Doctor of Humane Letters degree.

**ASAD M. MADNI** has long been recognized for, in the words of the National Academy of Inventors, his "highly prolific spirit of innovation in creating or facilitating outstanding inventions that have made a tangible impact on quality of life, economic development, and the welfare of society." From 1992 until the completion of its \$600 million acquisition by Schneider Electric in 2006, Madni served as president, COO, and CTO of BEI Technologies, leading the development and commercialization of intelligent sensors, systems, and instrumentation for which he has received worldwide acclaim. our understanding of the universe are the result of unprecedented pointing accuracy and stability afforded by BEI's Extremely Slow-Motion Servo Control System for the telescope's Star Selector System. Another revolutionary technology, the MEMS GyroChip®, provides electronic stability control and rollover protection in passenger vehicles worldwide—saving millions of lives every year.

Prior to BEI, Madni was with Systron-Donner Corporation for 18 years in senior technical and executive positions, eventually serving as chairman, president, and CEO. He made seminal contributions to the development of radiofrequency and microwave systems and instrumentation, which significantly enhanced the capabilities of the U.S. Tri-Services and U.S. allies. He is currently a distinguished adjunct professor and distinguished scientist at University of California, Los Angeles, a faculty fellow at the UCLA Institute of Transportation Studies, a faculty fellow at the UCLA Connected Autonomous Electric Vehicle Consortium, and executive managing director and chief technical officer of Crocker Capital.

He received an associate's degree in applied science from RCA Institutes Inc., bachelor's and master's degrees in science from UCLA, a Ph.D. from California Coast University, and an S.E. from MIT Sloan School of Management. He is credited with more than 200 refereed publications, 69 issued or pending patents, and is the recipient of numerous national and international honors and awards, including the 2022 Medal of Honor, the highest honor awarded by the Institute of Electrical and Electronics Engineers (IEEE). In 2011, he was elected to the National Academy of Engineering, and in 2014 he was elected a Fellow of the National Academy of Inventors. He has also been elected a fellow/eminent engineer to 18 of the world's most prestigious academies and professional societies, including the Royal Academy of Engineering and the Canadian Academy of Engineering. He has been awarded five honorary doctoral degrees and six honorary professorships. In 2019, Eta Kappa Nu, the honor society of the IEEE, named its top award in his honor, in recognition of his nearly 50 years of technical and philanthropic accomplishments and visionary leadership.

Madni will receive an honorary Doctor of Engineering degree.

A Modern Hippocratic Oath (modified)

**By Louis Lasagna, M.D., *Dean Emeritus, Graduate School of Biomedical Sciences***

I swear to fulfill, to the best of my ability and judgment, this covenant:

I will respect the hard-won scientific gains of those physicians in whose steps I walk, and gladly share such knowledge as is mine with those who are to follow.

I will apply, for the benefit of the sick, all measures, which are required, avoiding those twin traps of over-treatment and therapeutic nihilism.

I will remember that there is art to medicine as well as science, and that warmth, sympathy, and understanding may outweigh the surgeon's knife or the chemist's drug.

I will not be ashamed to say, "I know not," nor will I fail to call in my colleagues when the skills of another are needed for a patient's recovery.

I will respect the privacy of my patients, for their problems are not disclosed to me that the world may know. Most especially must I tread with care in matters of life and death.

I will remember that I do not treat a fever chart, or a cancerous growth, but a sick human being, whose illness may affect the person's family and economic stability. My responsibility includes these related problems, if I am to care adequately for the sick.

I will prevent disease whenever I can, for prevention is preferable to cure.

I will remember that I remain a member of society, with special obligations to all my fellow human beings, those sound of mind and body, as well as the infirm.

If I do not violate this oath, may I enjoy life and art, respected while I live and remembered with affection thereafter.

May I always act so as to preserve the finest traditions of my calling and may I long experience the joy of healing those who seek my help.
